FOR FALL
DELIVERY

General Information

SHIPPING TIME

We begin shipping peony roots about September 10th and continue until the ground freezes.

SIZE OF PLANTS

Prices quoted are for strong three to five eye divisions with well balanced root systems. Our divisions are all taken from healthy, young plants of the highest quality.

GUARANTEE

We guarantee all plants sold by us to be healthy and true to name and should any of them prove otherwise, we shall, at any time within three years from date of invoice, replace such plants without additional charge.

TERMS

Cash with order or before shipment. We prepay transportation charges on all retail orders.

TIME TO PLANT

While peonies may be safely planted after September 1st and before the ground freezes in the fall, the best time to plant is from September 15th to October 15th, as by planting them at that time they will make a little root growth before winter and most of them will bloom the following spring. We like to have our own planting completed by October 15th if possible.

CAUTION

After being transplanted Peonies will very seldom produce typical blooms the first season, many fine double varieties producing only single or semi-double blooms, and it is usually not until the third year after planting that the finest flowers are produced. Customers planting Peonies should remember this and not be disappointed if the blooms do not reach their expectations the first year.

CULTURE

Nothing will more richly pay for good care and cultivation than Peonies. In planting, place them so that the top-most eyes or buds will be about two or two and a half inches

below the surface of the ground, and if they are to be planted in a permanent bed give each plant about twelve square feet of space. Any good garden soil will do for peonies, but best results are obtained in a reasonably heavy clay loam. Do not expect good results from plants set in gravel or in shady places. When fertilizer is used in connection with planting, it should be well incorporated with the soil and should be used sparingly, being careful not to let it come in direct contact with the roots, as it is very likely to cause root-rot. It might also be well to cover the plants with a mulch of straw or leaves to a depth of three or four inches during the first winter.

RATING

The most constructive and helpful work of the American Peony Society has been the publication of the Symposium of votes by its members upon the merits of all the varieties in general cultivation. A vote of 10 points means that the variety is perfect, 9 points nearly perfect, 8 points extra good, 7 points good. The figures prefixed to the name of each variety that has been voted upon represents the average of all the votes on the variety. Where ratings have been omitted, the variety either did not receive twenty votes, or no vote has been taken.

It is impossible to describe on the printed page the rare beauty that is to be found in the living flower, and we advise that when possible, a peony planting be visited. Our own planting is always open to visitors during the blooming season, which usually comes the second and third week in June, and it is not uncommon for us to receive several thousand visitors in a single day. Our main planting is now located on East Garfield Ave., which is the southern boundary of the city, and comprises about ten acres consisting of nearly a hundred of the best varieties.

Iris

We list but a few varieties of iris, which we consider to be among the best. Prices have been maintained at the lowest level consistent with the high quality of the plants which we send out.

The ratings published in the iris list refer respectively to the exhibition and garden values of the variety and are based on a perfect score of 100.

We sell three plants of the same variety for the price of two; six for the price of three. Prices on larger quantities will be quoted on request. No iris order accepted for less than \$1.00 except when included with an order for peonies.

All plants sold by us are guaranteed to be healthy and true to name and we shall replace any which are found otherwise.
